

Day 50!

Let's celebrate we're 'halfway to 100 days of school' ~ learning is important wherever you are! Choose some fun activities from the grid to practise your counting and learn about halves!

Count to 50!

Lets start by ones ~ 1, 2, 3, 4, 5, 6, 7, 8, 9, 10....

Try skip counting in 10's ~ 10, 20, 30, 40, 50. (Can you skip count forwards and backwards?)

Challenges for bigger people... Try skip counting in 5's ~ 5, 10, 15, 20, 25 How about in 2's?

Need a snack?

Half can be represented as $\frac{1}{2}$ (two equal parts making one whole)

Cut your toast and sandwiches in halves today, we wonder what shape you'll choose?

Cut your fruit in half, eat half now and half later!

Lets get crazy!

Wear your clothes half one colour, half another colour.

How about half PJ's and half school clothes?!

What about your hair ~ a crazy 'half style'?

Need a movement break?

Challenge someone to do 50 star jumps with you!

(What other exercises can you do 50 of?)

Scavenger Hunt!

Find 50 items, count them out carefully!

Can you find 50 items from outside (like honkey nuts, stones or leaves) and 50 items from inside? (Perhaps something yummy like 50 sultanas, 50 pieces of popcorn?)

Let's do things by halves!

Read half a book in the morning ~ predict what is going to happen and then read the second half of the book later in the day.

Colour in half of your 100's chart (if you have one).

Write the numbers from 1 to 50.

Challenge yourself to write the number 50, fifty times!!

My Day 50 Activities!
